

HOW TO CARE FOR VIAGGIO DOOR HARDWARE

All Viaggio Hardware is lacquered for longevity and durability, providing modern looks for decades. Occasional gentle cleaning is necessary to remove built-up oils and dirt from everyday handling and bring back the set's original shine and luster.

CLEANING DIRECTIONS:

1. Using a soft cloth dipped in a $\frac{1}{4}$ cup of clean water mixed with a few drops of liquid dishwashing soap, gently wipe the surface of the door hardware.
2. Using water only, wipe the surfaces of the door hardware again to remove any remaining soap.
3. Immediately dry all surfaces with a clean towel.
4. Do not spray or immerse hardware in liquid.

DISINFECTING DIRECTIONS:

1. Clean your door hardware according to the steps previously mentioned above.
2. After cleaning, apply a disinfectant to a soft clean cloth.
3. Wipe the disinfectant thoroughly onto all surfaces of the door hardware. Be sure to follow the instructions provided on the disinfectant label.
4. Most disinfectants are effective when applied and left to air dry, so you won't need to wipe them off.
5. For additional information, follow the Centers for Disease Control & Prevention (CDC) guidelines under "How to Clean and Disinfect."
